

Linear actuators DFPI

FESTO

Key features

Function

DFPIs are adjustable linear actuators. Product versions with an integrated displacement encoder DFPI-...-E-... are available.

The displacement encoder integrated in the DFPI-...-E-... version returns an analogue voltage or current signal proportional to the position of the piston. This can be used for operation with an external positioner. The positions are specified via an analogue setpoint signal 4 ... 20 mA. The position feedback uses an analogue feedback signal of 4 ... 20 mA. The feedback signal guarantees high reliability and simple diagnostics for the operator. The travel speed can be influenced using the integrated flow control screws. Variants with a mounting interface to ISO 15552 are available. The sturdy corrosion-resistant design of the DFPI is ideal for use under harsh ambient conditions.

Innovative

- Ready-to-install, compact unit for easy installation
- Sturdy and corrosion-resistant, ideal for use under harsh ambient conditions
- Suitable for directly attaching a positioner in accordance with VDE/VDI 3847-2 and valve terminal VTOP for additional pneumatic functions. The integrated air supply avoids leakage caused as there are fewer connecting points between the individual components, thus preventing errors

Versatile

- Wide range of accessories for virtually any installation situation
- Suitable for use in potentially explosive locations
- Additional contactless binary end-position sensing possible with proximity switches
- Suitable for applications with closed-loop controlled linear and swivel motions

Design

- Double-acting
- Optionally with integrated displacement encoder or fully integrated positioner
- Sizes Ø 100, Ø 125, Ø 160, Ø 200, Ø 250 and Ø 320
- Stroke lengths 40 to 990 mm
- Mounting interfaces to ISO 15552
- IP65, IP67, IP69K, NEMA4
- ATEX certification

Key features

Product options for DFPI-...-NB3P... based on ISO 15552

- [1] DFPI-...-ND2P-E-NB3VM12 with piston diameter 160 ... 320
- [2] DFPI-...-C1V-NB3
- [3] DFPI-...-E-NB3...
- [4] M12x1 plug, 5-pin, A-coded
- [5] Cable fitting M16x1.5
- [6] Metal flange socket
- [7] Push-in fitting QS¹
- [8] Air supply on the actuator, stainless steel pipe or plastic tubing
- [9] Connecting cable NHSB¹, 5-core, for DFPI-...-C1V-P-A
- [10] Connecting line NHSB¹ 3-core, for DFPI-...-E-P
- [11] Manifold block for direct attachment of a positioner in accordance with VDE/VDI 3847-2 and valve terminal VTOP for additional pneumatic functions

Product range overview

DFPI-...-E-NB3...

- For operation with an external positioner with analogue voltage input or 4 ... 20 mA current input
- Potentiometric displacement encoder integrated into the actuator DFPI, optionally with integrated 4...20 mA transmitter for analogue current output signal for displacement (DFPI-...ENB3P-...-I-...)
- Sturdy tie rod design
- Double-acting
- Mounting interfaces to ISO 15552 on bearing and end caps

Version	Characteristics		→ page
DFPI-...-E-NB3...	DFPI-...-E-NB3P-...	 • Electrical, pneumatic connection using metal flange socket, pre-assembled connecting cable NHSB, see chapter on Accessories • Air supply on the outside of the actuator via plastic tubing	9
	DFPI-...-E-NB3P9B2-...	 • Electrical connection using cable connector M16x1.5, screw terminal • Pneumatic connection G3/8 • Air supply on the outside of the actuator, either using a stainless steel pipe for variant DFPI-...-E-NB3P9B2-M or plastic tubing for variant DFPI-...-E-NB3P9B2	9
	DFPI-...-E-NB3M12B2-...	 • Electrical connection via M12x1 plug, 5-pin • Pneumatic connection G3/8 • Air supply on the outside of the actuator, either using a stainless steel pipe for variant DFPI-...-E-NB3M12B2-M or plastic tubing for variant DFPI-...-E-NB3M12B2	9
	DFPI-...-ND2P-E-NB3VM12	 • Piston Ø 160 ... 320 • Direct attachment of a positioner in accordance with VDE/VDI 3847-2 and valve terminal VTOP for additional pneumatic functions • Electrical connection via M12x1 plug, 5-pin • Pneumatic connection G1/2 • Air supply on the outside of the actuator, either using a stainless steel pipe for variant DFPI-...-E-NB3VM12B2-M or plastic tubing for variant DFPI-...-E-NB3VM12B2	9

Product range overview

DFPI-...-C1V-NB3...

- Digital electropneumatic positioner integrated within the actuator housing
- Setpoint input 4 ... 20 mA
- Position feedback 4 ... 20 mA
- Safety position with either retracting or advancing piston rod depending on the product version
- Sturdy tie rod design
- Double-acting
- Mounting interfaces to ISO 15552 on bearing and end caps

– Air supply for characteristic value M	100 ... 320	Stainless steel pipe or plastic tubing
– Static seals	100 ... 320	NBR
– Note on materials	100 ... 320	RoHS-compliant
		Contains paint-wetting impairment substances

Max. lateral force as a function of stroke length l

The maximum lateral force (horizontal/vertical) applies to the static application. In closed-loop operation, the maximum lateral force needs to be adjusted to the type of control. If necessary, the piston rod must be guided to avoid system vibration.

Horizontal lateral force

Vertical lateral force

Function

-  - Piston $\varnothing$
100 ... 320 mm
-  - Stroke
40 ... 990 mm
-  - Force
4417 ... 46385 N

General technical data

Stroke	[mm]	40 ... 990
Operating mode		Double-acting
Based on standard		ISO 15552
Cushioning		No cushioning
Mounting position		Any
Design		Piston Piston rod Tie rod Cylinder barrel
Position sensing		Via integrated displacement encoder
Measuring principle of displacement encoder		Potentiometer
Pneumatic connection		With specific accessories For tubing O.D. 8 mm For tubing O.D. 10 mm
Electrical connection		With specific accessories 5-pin Straight plug Screw terminal

General electrical data

Operating voltage range	[V DC]	21.6 ... 26.4
Nominal operating voltage	[V DC]	24
Setpoint input	[mA]	4 ... 20
Analogue output	[mA]	4 ... 20
Accuracy of analogue output	[%FS]	1
Max. current consumption	[mA]	220
Reverse polarity protection		For operating voltage For setpoint value Initialisation connection
Positioning accuracy	[%FS]	1
Repetition accuracy	[%FS]	± 1
Size of dead space	[%FS]	1
Hysteresis	[%FS]	± 1

Datasheet

Operating and environmental conditions		
Operating pressure	[MPa]	0.3 ... 0.8
	[psi]	43.5 ... 116
	[bar]	3 ... 8
Nominal operating pressure	[MPa]	0.6
	[psi]	87
	[bar]	6
Operating medium	Compressed air to ISO 8573-1:2010 [7:4:4]	
Note on the operating/pilot medium	Lubricated operation possible (required for further operation)	
Temperature of medium	[°C]	−5 ... +40
Ambient temperature	[°C]	−5 ... +50
Storage temperature	[°C]	−5 ... +50
Relative humidity	[%]	5 ... 100, condensing
Degree of protection	IP65, IP67, IP69K, NEMA 4	
Vibration resistance to DIN/IEC 68, Part 2-6	Tested to severity level 2	
Continuous shock resistance to DIN/IEC 68, Part 2-82	Tested to severity level 2	
Approval	RCM	
UKCA marking (see declaration of conformity) ¹⁾	To UK EMC regulations	
	To UK EX regulations	
	To UK RoHS regulations	
CE marking (see declaration of conformity) ¹⁾	To EU EMC Directive ²⁾	
	To EU Explosion Protection Directive (ATEX)	
	To EU RoHS Directive	

1) Additional information: www.festo.com/catalogue/... → Support/Downloads.

2) For information about the area of use, see the EC declaration of conformity at: www.festo.com/catalogue/... → Support/Downloads.

If the devices are subject to usage restrictions in residential, commercial or light-industrial environments, further measures for the reduction of the emitted interference may be necessary.

ATEX	
ATEX category for gas	II 3G
Type of (ignition) protection for gas	Ex ec IIC T4 X Gc
ATEX category for dust	II 3D
Type of (ignition) protection for dust	Ex tc IIIC T120°C X Dc
Explosion ambient temperature	−5°C ≤ Ta ≤ +50°C
Explosion protection certification outside the EU	EPL Dc (GB)
	EPL Gc (GB)

Datasheet

Forces [N]						
Piston Ø	100	125	160	200	250	320
Theoretical force at 6 bar, advancing	4712	7363	12064	18850	29452	48255
Theoretical force at 6 bar, retracting	4417	6881	11581	18080	28274	46385

Maximum permissible mass:

$$m_2 = \frac{2 \cdot E}{v^2} - m_1$$

v Permissible impact velocity
E Max. impact energy
m₁ Moving mass (actuator)
m₂ Moving payload

Air consumption [l]						
Piston Ø	100	125	160	200	250	320
Air consumption, advancing, per 10 mm stroke	0.549	0.859	1.407	2.199	3.436	5.63
Air consumption, retracting, per 10 mm stroke	0.515	0.803	1.351	2.111	3.299	5.412

Weight [g]						
Piston Ø	100	125	160	200	250	320
Basic weight with 0 mm stroke	5280	7950	14330	20410	35370	57550
Additional weight per 10 mm stroke	90	134	200	238	358	582
Moving mass with 0 mm stroke	1060	1900	3700	4800	9300	16500
Additional moving mass per 10 mm stroke	28	53	89	89	134	227

		High-alloy stainless steel
– Piston rod wiper seal	100	TPE-U (PU)
	125 ... 320	NBR
– Static seals	100 ... 320	NBR
– Note on materials	100 ... 320	RoHS-compliant
		Contains paint-wetting impairment substances

Max. lateral force as a function of stroke length l

The maximum lateral force (horizontal/vertical) applies to the static application. In closed-loop operation, the maximum lateral force needs to be adjusted to the type of control. If necessary, the piston rod must be guided to avoid system vibration.

Horizontal lateral force

200			230		60			175	380	2	5160	152598	SNG-200

- 1) Corrosion resistance class CRC 2 to Festo standard FN 940070
Moderate corrosion stress. Indoor applications in which condensation can occur. External visible parts with primarily decorative surface requirements that are in direct contact with the normal surrounding industrial environment.
- 2) Suitable for ATEX (areas)

Accessories

Swivel flange SNCB/SNCB-...-R3

Material:

SNCB: Die-cast aluminium
SNCB-...-R3: Die-cast aluminium with
protective coating,
high corrosion protection
RoHS-compliant

Dimensions

125	1	1860	174396	SNCB-125	3	1776	176950	SNCB-125-R3

1) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. Dry indoor applications, as well as protection during transport and storage. Also applies to parts behind covers, in non-visible internal areas, or parts that are covered in the application (e.g. drive trunnions).

Corrosion resistance class CRC 3 to Festo standard FN 940070

High corrosion stress. Outdoor exposure under moderate corrosive conditions. External visible parts with primarily functional surface requirements that are in direct contact with the normal surrounding industrial environment.

Swivel flange SNGB

For clevis foot LN/LSN

Material:

Die-cast aluminium
