

Single-axis systems

FESTO

Key features

At a glance

A single-axis system (YXCS) is an axis module (EHM...) for any single-axis movement.

- Ideal for long gantry strokes and heavy loads
- High mechanical rigidity and sturdy design
- Use of tried-and-tested drives/axes from Festo

- [1] Servo motor for the Y-module
- [2] Y-axis
- [3] Energy chain for the Y-module
- [4] Profile mounting/adjusting kit
- [5] Electrical signals (such as for end-position sensing) are transferred collectively via the multi-pin plug distributor

Description of the modules

Single-axis system

Setup:

The Y-module EHM... consists of a linear axis which is powered by a servo motor. The following components are located on the motor side:

- Energy chain
- Multi-pin plug distributor for proximity switch (if a sensor package has been selected)

Sample image:

Dispatch options

Fully assembled:

The single-axis system is fully assembled. All cables are installed and connected.

System overview ¹⁾	
Size	YXCS
Max. working stroke	3000 mm
Max. payload	Dependent on the selected dynamic response
Mounting position	Horizontal

1) Drive package depends on the configuration selected.

Key features

Configurator: Handling Guide Online (HGO)

Selecting a handling system

Planning complex handling systems takes a lot of time. You can use the configurator "Handling Guide Online" (HGO) to design a customised handling system for your application in just a few steps.

You can choose from the following systems:

- Single-axis system
- 2D linear gantry
- 2D planar surface gantry
- Three-dimensional gantry
- 3D cantilever system

Advantages:

- Automatic selection of all relevant components
- Automatic design and calculation of the workload
- Quote created automatically
- CAD model available immediately
- Configuration-specific parameters for servo drives available immediately
- Complete Eplan project can be ordered according to the individual configuration
- Fully automated processing
- You can order fully or partially assembled systems through the Online Shop
- Lots of possible options

Selecting the handling solution

Select your handling system

☐ Single-axis system

Single-axis movement:
Single-axis module as a complete system.
Easy to connect to your own front unit.
☐ Animation

☐ 2D linear gantry

Movements in 2D in the vertical working space:
Linear gantries as complete systems.
Electric and pneumatic axes can be combined
☐ Animation

☐ 2D gantry

Movements in 2D in the horizontal working space:
Planar surface gantries as complete systems.
Combining electric axes.
Easy to connect to your own Z unit.
☐ Animation

☐ 3D gantry

Movements in 3D:
Three-dimensional gantries as complete systems.
Electric and pneumatic axes can be combined
☐ Animation

☐ 3D cantilever system

Movements in 3D:
Cantilever system as complete system.
Electric and pneumatic axes can be combined

Entering the application data

- Payload
- Drive system of the axis
- Distance from the centre of the load
- Working stroke
- Reference cycle

Key features

Standard components within the handling system

The handling system comprises a number of tried-and-tested standard components from Festo. Different components are used depending on the configuration. The single axes installed will be displayed in the configurator HGO on the "Result of calculation" page.

Drives/axes

Y-axis

Toothed belt axis EGC-TB-KF

- Electrical
- Rigid, closed profile
- Recirculating ball bearing guide for high loads and torques
- High dynamic response and minimum vibration

Toothed belt axis EGC-HD-TB

- Electrical
- Flat drive unit with rigid, closed profile
- Duo guide rail
- For maximum loads and torques, high feed forces and speeds and long service life

Possible axis combinations ¹⁾	
YXCS	• Toothed belt axis EGC-50-TB-KF • Toothed belt axis EGC-80-TB-KF • Toothed belt axis EGC-120-TB-KF • Toothed belt axis EGC-185-TB-KF • Toothed belt axis with heavy-duty guide EGC-HD-125-TB • Toothed belt axis with heavy-duty guide EGC-HD-160-TB • Toothed belt axis with heavy-duty guide EGC-HD-220-TB

1) Drive package depends on the configuration selected.

Key features

Standard components within the handling system

The handling system comprises a number of tried-and-tested standard components from Festo. Different components are used depending on the configuration. You can alter the scope and design of the drive package in the configurator HGO on the "System configuration" page.

Motors and controllers

Servo motors EMMT-AS

- Dynamic, brushless, permanently excited servo motor
- Digital absolute displacement encoder in single-turn or multi-turn version
- With optional brake

Stepper motors EMMT-ST

- Two-phase hybrid technology
- Digital absolute displacement encoder in single-turn or multi-turn version
- Simple connection technology (OCP: one cable plug) – hybrid cable: motor cable and connecting cable for supply and encoder in one
- Plug can be rotated 310°
- With optional brake

Stepper motors EMMB-ST

- Two-phase hybrid technology
- Digital absolute displacement encoder in single-turn or multi-turn version
- Simple connection technology (OCP: one cable plug) – hybrid cable: motor cable and connecting cable for supply and encoder in one
- Can be positioned facing to the front or back
- With optional brake

Gear unit EMGA

- Low-backlash planetary gear
- Gear ratio $i = 3$ and 5
- Life-time lubrication

Servo drive CMMT-AS, for servo motor

- Universal servo drive
- For synchronous servo motors
- Integrated EMC filters
- Integrated brake chopper
- Integrated braking resistor
- Position controller
- Speed controller
- Force controller
- Range of control functions

Options:

- Safety function: safe torque off (STO)/category 4, Performance Level e
- Safe stop 1 (SS1)
- Safe brake control (SBC) up to SIL3/ category 3, Performance Level e

- Bus protocols
 - EtherCAT®
 - PROFINET RT/IRT
 - EtherNet/IP
 - Modbus TCP

Servo drive CMMT-ST, for stepper motor

- Servo drive for operating stepper motors and brushless direct current motors
- Options for point-to-point and interpolating motion and for precise positioning
- Primary voltage from 24 ... 48 V DC
- Position controller
- Speed controller
- Force controller
- Range of control functions

Options:

- Safety function: safe torque off (STO)/category 3, Performance Level e
- Safe stop 1 time controlled (SS1-t)

- Bus protocols
 - EtherCAT®
 - PROFINET RT/IRT
 - EtherNet/IP
 - Modbus TCP

Ordering data – Accessories

Module/motor combinations

We recommend that the single-axis system is operated with the proposed motors from Festo. These precisely match the mechanical system. When using third-party motors, it is essential that the technical limits are observed.
