

Positioner CMSH

FESTO

Characteristics

At a glance

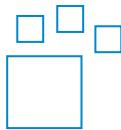

The CMSH is an intelligent digital positioner. It controls the position of a process valve that is actuated by a pneumatic actuator. Thanks to the large ambient temperature range of $-40 \dots +80^\circ\text{C}$ and its high degree of protection (IP66/IP67), it can also be used under harsh ambient conditions.

The CMSH is a 4 ... 20 mA loop-powered 2-wire device. An additional power supply is therefore not required. Configuration and operation can be performed locally on an LC display using operating buttons. A HART interface permits remote access and integration into higher-level systems. There are product variants available for single- or double-acting actuators with fail-safe, or fail in place safety positions. The product is suitable for mounting on actuators with a mechanical interface according to VDI/VDE3845-1 (IEC60534-6-2) or VDI/VDE3847-2.

The product variant CMSH-S... has an internal position sensor for displacement/angular detection. Alternatively, an external potentiometric position sensor can be connected to the positioner on all product variants.

Configurable product

This product and all its product options can be ordered online via the configurator.

Overview

Integration into higher-level systems

- Simple integration using EDD (Electronic Device Description) or FDT (Field Device Tool) based transmission of information to higher-level DCS (Distributed Control Systems) and asset management tools
- Configuring and commissioning with a clear and user-friendly interface
- Fast access to the required additional information for maintenance and diagnostics
- Further information on the EDD or FDT software www.festo.com/catalogue/cmsh → Downloads

Design type

[S]	Positioner, displacement/integrated angular position detection
-----	--

- With internal position sensor for detecting displacement/angle
- Alternatively, an external potentiometric position sensor can be connected with this version of the product.

[SE]	Positioner, displacement/external angular position detection
------	--

- Suitable for connecting an external potentiometric displacement/angle sensor
- Variant does not have a position indicator

Characteristics

[SE1]	Positioner, external displacement/angle detection, without inspection window	[SX1]	Positioner, integrated displacement/angle detection, without position indicator and without inspection window
<ul style="list-style-type: none"> • Suitable for connecting an external potentiometric displacement/angle sensor • Variant does not contain an internal displacement/angle sensor • Without inspection window 		<ul style="list-style-type: none"> • Suitable for connecting an external potentiometric displacement/angle sensor • With internal position sensor for detecting displacement/angle • Variant does not have a position indicator • Without inspection window 	

Mechanical interface

[VDE1]	VDI/VDE 3845	[VDE2]	VDI/VDE 3847-2
<ul style="list-style-type: none"> • Suitable for mounting on actuators with a mechanical interface in accordance with VDI/VDE 3845-1 (IEC 60534-6-2) • Use mounting flange adapter according to VDI/VDE 3845-1, IEC 60534-6-2 see accessories CAFM 		<ul style="list-style-type: none"> • Suitable for mounting on actuators with a mechanical interface according to VDI/VDE 3847-2 • Use mounting kit according to VDI/VDE 3847-2, see accessories CAFM 	

Function

[S]	Single-acting	[D]	Double-acting
Suitable for single-acting actuators			Suitable for double-acting actuators
[SD]	Double-acting/single-acting, switchable		
	<ul style="list-style-type: none"> • Suitable for single-acting or double-acting drives • The pneumatic manifold block CAPS determines the type of function of the positioner, see accessories CAPS • The pneumatic manifold CAPS required for operation is not pre-assembled and is not in the scope of delivery 		

Safety position

[A]	Exhaust	[C]	Hold the last position
<ul style="list-style-type: none"> • If the electrical power supply fails, the pneumatic output (2) on the positioner is exhausted • The pneumatic output (4) on the positioner is also exhausted in the case of double-acting drives. 		<ul style="list-style-type: none"> If the electrical power supply fails, the pneumatic outputs (2) and (4) on the positioner are closed 	

Pneumatic connection

[G14]	G1/4	[N14]	1/4 NPT
Pneumatic connection for fittings with G1/4 male thread			Pneumatic connection for fittings with 1/4 NPT male thread

Connecting thread

[M20]	M20	[N12]	1/2 NPT
Connecting thread for cable fitting or plug screw with M20 thread			Connecting thread for cable fitting or plug screw with 1/2 NPT thread

I/O variant

[V2]	1 digital input, 2 digital outputs and 1 analogue output
<ul style="list-style-type: none"> • Additional inputs and outputs • 1 analogue output for position feedback • 2 digital outputs for feedback of the device status and the position limit values • 1 digital input for triggering functions 	

Characteristics

Pressure gauge connection

[M] Prepared

- Additional pressure gauge connection for displaying supply air and actuator chamber pressures
- Suitable for pressure gauge with G1/8 (CMSP-...-G14) or NPT 1/8 (CMSP-...-N14) male thread
- Suitable for pressure gauge of nominal size 23/27

EU certification

Datasheet

General technical data

Design type	Positioner, displacement/integrated angular position detection	Positioner, displacement/external angular position detection
Design	Digital, electropneumatic positioner	
Mode of operation	Double-acting, Single-acting	Double-acting
Design characteristics	Safety pneumatic output 2 exhausted, Safety pneumatic output 4 pressurised	
Mounting position	optional	
Type of mounting	With accessories, To VDI/VDE 3845	
Functional principle of measuring system	Potentiometer	External
Sensing range	0 ... 115 deg	-
Display	LCD display, via software 90° rotatable	
Setting options	Via display and keys	
Cycle time	20 ms	
Nominal altitude of use	<= 2000 m NHN	
Overtoltage category	II	
Product weight	2,055 ... 2,640 g	2,520 g

Pneumatic characteristics

Design type	Positioner, displacement/integrated angular position detection	Positioner, displacement/external angular position detection
Operating pressure	1.4 ... 8 bar	
Operating pressure	0.14 ... 0.8 MPa	
Operating pressure	20.3 ... 116 psi	
Operating medium	Compressed air to ISO 8573-1:2010 [7:4:4]	
Note on operating and pilot medium	Lubricated operation not possible	
Air flow rate at $\Delta p = 6$ bar	270 ... 380 l/min	270 l/min
Pneumatic connection	G1/4, 1/4 NPT, With specific accessories	G1/4

Datasheet

Characteristic electrical data

Characteristic electrical data	
Reverse polarity protection	yes
Connection resistance	3 - 80 kOhm
digital input, signal range	4 - 20 mA with HART
Analogue inputs, input impedance	480 ohm at 20 mA
Analog inputs, overload protection	<65 mA
Analogue inputs, electrical isolation	yes
Analogue outputs, functional principle	Regulated power source with external supply
digital output, signal range	4 - 20 mA
Analogue outputs, supply voltage	24
Analogue outputs, reverse polarity protection	yes
Analog outputs, short circuit current rating	yes
Analog outputs, overload protection	yes
Analogue outputs, galvanic isolation	yes
Characteristic for inputs	1x to IEC 61131-2, type 3, 2x to IEC 61131-2, type 3
Digital inputs, reverse polarity protection	yes
Digital inputs, electrical isolation	yes
Digital inputs, overload protection	33 V
Switching output ¹⁾	2x to IEC 60947-5-6 or 2x to DIN EN 61131-2 type 2, switchable
Digital outputs, supply voltage	8.2 V, 24 V
Digital outputs, short circuit current rating	yes
Digital outputs, overload protection	Yes, <30 V
Digital outputs, electrical isolation	yes
Electrical connection 1, function	Analogue input, Digital input, External path/angle sensor
Electrical connection 1, connection type	Terminal strip
Electrical connection 1, connector system	Spring-loaded terminal
Electrical connection 1, number of connections/cores	7
Electrical connection 2, function	2x digital output, Analogue output, Digital input
Electrical connection 2, connection type	Terminal strip
Electrical connection 2, connector system	Spring-loaded terminal
Electrical connection 2, number of connections/cores	8
Cable fitting	2x 1/2 NPT, 2x M20x1.5
Max. cable length	30 m for external position sensor, Shielded

1) Selection NAMUR output or PLC output configurable via software.

Datasheet

Operating and environmental conditions

Ambient temperature	-40 ... 80°C
Storage temperature	-40 ... 80°C
Climatic category	1K5 to EN 60721 for storage, 4K3 to EN 60721 for operation
Degree of protection	IP66, IP67
Shock resistance	Shock test with severity level 1 to FN 942017-5 and EN 60068-2-27
Vibration resistance	Transport application test with severity level 2 to FN 942017-4 and EN 60068-2-6
Pollution degree	3
Operating pressure	1.4 ... 8 bar
Approval	RCM trademark
Conforms to standard	NAMUR NE 21
Operating medium	Compressed air to ISO 8573-1:2010 [7:4:4]
Note on operating and pilot medium	Lubricated operation not possible
CE mark (see declaration of conformity) ¹⁾	To EU EMC Directive, To EU Explosion Protection Directive (ATEX), In accordance with EU RoHS Directive

1) More information www.festo.com/sp Certificates.

Materials

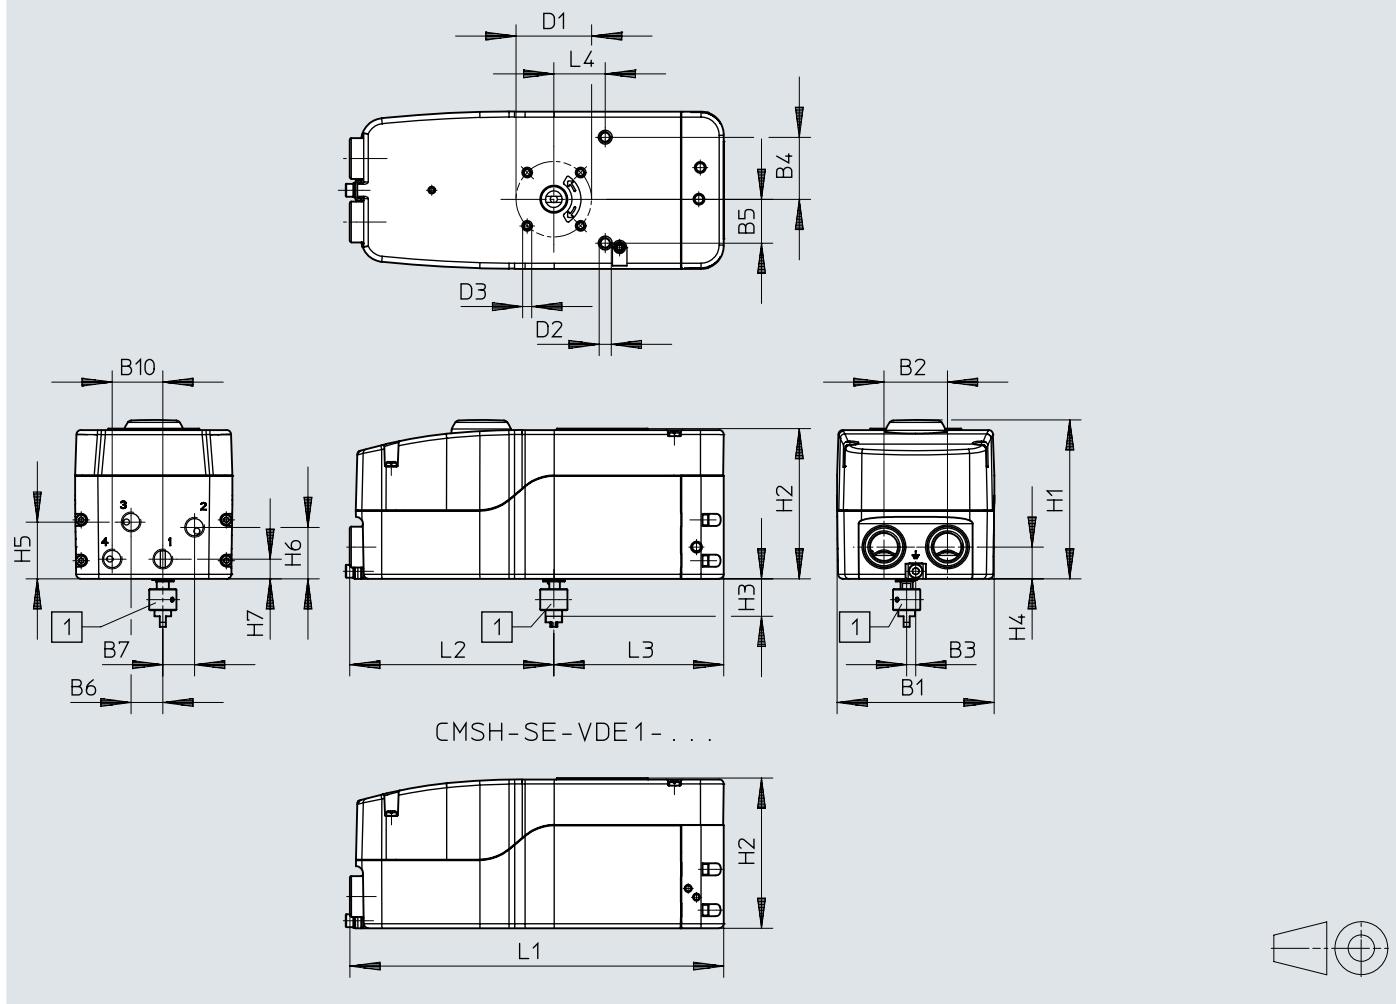

Material housing	Aluminium, powder-coated
Material screen	PC
Material shaft	High-alloy stainless steel
Material coupling	High-alloy stainless steel
Material screws	Galvanised steel
Material seals	EPDM, NBR, VMQ
Note on materials	RoHS-compliant
LABS (PWIS) conformity	VDMA24364 zone III

ATEX

ATEX category gas	II (1) 2G, II 2G
Explosion ignition protection type for gas	Ex ia [ia Ga] IIC T4/T6 Gb, Ex ib IIC T4/T6 Gb
Explosion ambient temperature	-40°C <= Ta <= +135°C, T4: -40°C <= Ta <= +80°C, T6: -40°C <= Ta <= +50°C
Certificate issuing authority	BVS 23 ATEX E004, DNV 24.0177, IECEx BVS 23.0001
Explosion protection certification outside the EU	EPL Db (BR), EPL Db (GB), EPL Db (IEC-EX), EPL Gb (BR), EPL Gb (GB), EPL Gb (IECEx)
