

Guided drives DFM/DFM-B

FESTO

Festo Core Range
Solves the majority of your automation tasks

Worldwide:
Simply good:
Fast:

Quickest delivery – wherever, whenever
Expected high Festo quality
Easy and fast to select

With the Festo Core Range, we have selected the most important products and functions from our broad product catalogue, and added the quickest delivery.
The Core Range offers you the best value for your automation tasks.

Just look
for the
star!

Key features

At a glance

Drive and guide in a single housing

- Minimal space requirement
- Minimal mounting time
- Choice of supply ports
- Wide range of mounting options

Sturdy and precise

- High resistance to torsion
- Excellent rigidity
- Maintenance-free

High torque and transverse force absorption

- With plain-bearing guide: high rigidity thanks to large-diameter guide rods and four plain-bearing bushes
- With recirculating ball bearing guide: for movements involving torque loads

Wide choice of variants

Guided drive DFM

- Basic drive with strokes of up to 200 mm

Guided drive DFM-B

- Drive with strokes of up to 400 mm
- With precision end-position adjustment
- With pneumatic cushioning, adjustable PPV
- With shock absorber, self-adjusting, progressive

Application examples

Terminals

The guided drive is perfectly suited to clamping components for reliable further processing.

Lifting

The powerful and dynamic guided drive transports and lifts loads of more than 200 kg with ease.

Stopping

Loads of up to 150 kg are stopped reliably and safely, making the guided drive a resilient and sturdy stopper cylinder.

Key features

Use in conveyor technology

Lifting

Pushing

Stopping

Stopping with stop bracket

A buffer on the workpiece carrier is recommended!

Mounting options

Flat from the top

Flat from underneath

Sideways and underneath

At the front

For manufacturing lithium-ion batteries

DFM-...-F1A

Recommended for production systems for manufacturing lithium-ion batteries. Metals with copper, zinc or nickel as the main constituent are excluded from use. Exceptions are nickel in steels, chemically nickel-plated surfaces, printed circuit boards, cables, electrical plug connectors and coils.

Accessories

Please contact your Festo representative for information on which accessories are suitable for manufacturing lithium-ion batteries.

Product range overview

Peripherals overview

Piston Ø 6 ... 10

Accessories		Description	→ Page/Internet
[1]	Guided drive DFM	Guided drive, basic version	9
[2]	Proximity switch SMT-10G	Inserted into the slot lengthwise	75
[3]	One-way flow control valve GRLA	For regulating speed	78
[4]	Push-in fitting QSM/QS	For connecting tubing with standard O.D.	qs

Note

Only the following push-in fitting/one-way flow control valve may be used in combination with proximity switch SMT-10G:

- QSM-M3-2-I
- GRLA-M3

Note

Note the installation position of the proximity switches SMT-10G
→ User documentation

Extremely functional

Direction of movement

High resistance to torsion, torque and transverse force absorption

Peripherals overview

Piston Ø 12 ... 100

Accessories		Description	→ Page/Internet
[1]	Guided drive DFM	Guided drive, basic version	9
[2]	Slot cover ABP-5-S	For protecting the sensor cables and the sensor slots from contamination	78
[3]	Proximity switch SME-/SMT-8	Can be integrated in the profile barrel	76
[4]	One-way flow control valve GRLA	For regulating speed	78
[5]	Push-in fitting QSM/QS	For connecting tubing with standard O.D.	qs
–	Centring sleeves ZBH	4 or 6 included in the scope of delivery	75
–	Adapter	For drive/drive connections	79
		For drive/gripper connections	gripper

Extremely functional

Direction of movement

High resistance to torsion, torque and transverse force absorption

Deflection of the end plate

$$f = f_1 + f_2$$

f = total deflection of the end plate

f_1 = deflection due to average bearing clearance (GF)/bearing clearance (KF)

Bearing clearance GF with production tolerance ±0.01 mm

Bearing clearance KF determined through series of tests

f_2 = deflection due to transverse force

Deflection f_1 due to bearing clearance as a function of stroke l (with no load)

1 bearing per guide rod

GF: DFM-6/10 all strokes
 DFM-16/20 stroke ≤ 30 mm
 KF: DFM-12/16/20 stroke ≤ 30 mm

— Plain-bearing guide GF (average deflection f_1) for $\varnothing$ 6/10
 Plain-bearing guide GF (average deflection f_1) for $\varnothing$ 12 ... 100
 --- Recirculating ball bearing guide KF

2 bearing per guide rod

GF: DFM-12 stroke ≤ 30 mm
 GF+KF: DFM-12/16/20 stroke ≥ 40 mm
 DFM-25 ... 100 all strokes

— Plain-bearing guide GF (average deflection f_1)
 --- Recirculating ball bearing guide KF

Datasheet

Use as stopper cylinder

When used as a stopper cylinder, only guided drives with plain-bearing guide DFM-...-GF may be used.

Furthermore, the distance $l_{\max}$ (→ drawing) must not be exceeded.

The permissible kinetic impact energy at the end stop must also not be exceeded.

$$l_{\max} = \text{stroke } l + \text{height of stop bracket } L$$

$$l_{\max} = 50 \text{ mm}$$

Impact mass m as a function of impact velocity v

DFM-12 ... 25-GF, stroke < 30 mm

DFM-32 ... 100-GF, stroke < 50 mm

The values in the above graph are based on the assumption that the workpiece carrier is fitted with an elastic buffer with deformation of 1 mm. Only guided drives with a plain-bearing guide GF < 30 mm stroke may be used.

The values in the above graph are based on the assumption that the workpiece carrier is fitted with an elastic buffer with deformation of 2 mm. Only guided drives with a plain-bearing guide GF < 50 mm stroke may be used.

Datasheet

Calculating the service life for recirculating ball bearing guide KF

The service life of the guide depends on the load. To provide a rough indication of the service life of the guide, the graph below plots the load comparison factor f_v against the service life ratio q .

These values are only theoretical. You must consult your local contact person at Festo for load comparison factors f_v greater than 1.5.

Load comparison factor f_v as a function of service life ratio q

Example: The effect on the service life, deviating from the specified reference service life, can be determined by the service life ratio q :

Assuming:

Reference service life = 10000 km

Required service life = 3000 km

$$q = \frac{3000 \text{ km}}{10000 \text{ km}} = 0.3$$

The graph gives a load comparison factor f_v of 1.5. This means that the permissible total load can be utilised up to 150%.

Note

Engineering tool

→ www.festo.com/engineeringtools

$f_v > 1.5$ are only theoretical comparative values.

Calculation example

L1 = centre of gravity of the moving mass of the guided drive

L2 = centre of gravity of payload

L3 = centre of gravity of the entire moving mass

Length measurements should be provided with plus/minus signs as shown in the figure:

$L3 > 0$ = centre of gravity of the moving mass is on the payload side

$L3 < 0$ = centre of gravity of the moving mass is on the guide side

L4 = load side

L5 = guide side

Assuming:

- Guided drives: DFM-32-80-KF
- Stroke length: $H = 80 \text{ mm}$
- Centre of gravity of payload: $L_{\text{Load}} = 35 \text{ mm}$
- Payload: $m_{\text{Load}} = 10 \text{ kg}$
- Acceleration: $a_x = 2 \text{ m/s}^2$, $a_y = a_z = 0 \text{ m/s}^2$

To be determined:

- Loads $F_{y_{\text{dyn}}}/F_{z_{\text{dyn}}}$ and $M_{x_{\text{dyn}}}/M_{y_{\text{dyn}}}/M_{z_{\text{dyn}}}$
- Functional operation with combined load
- Expected service life

Datasheet

Calculation example

Solution:

Moving mass:

m_b = moving mass of guided drive

m_{Load} = payload

$$m_{b_total} = m_b + m_{Load}$$

From table → page 11

$$m_b = 1.173 \text{ kg}$$

$$m_{b_total} = 1.173 \text{ kg} + 10 \text{ kg} = 11.173 \text{ kg}$$

Centre of gravity of the moving mass

$$L_{b_ges} = \frac{L_1 \cdot m_1 + L_b \cdot m_b}{m_{b_ges}}$$

L_b = centre of gravity of the moving mass of the guided drive

m_b = moving mass of guided drive

L_{Load} = centre of gravity of payload

m_{Load} = payload

From table → page 11

$$L_b = 54.7 \text{ mm}$$

$$L_{b_ges} = \frac{(+35 \text{ mm}) \cdot 10 \text{ kg} + (-54.7 \text{ mm}) \cdot 1.173 \text{ kg}}{11.173 \text{ kg}} = 25.6 \text{ mm}$$

Length measurements should be provided with plus/minus signs as shown in the figure:

$L_{b_total} > 0$ = Centre of gravity of the moving mass is on the payload side

$L_{b_total} < 0$ = Centre of gravity of the moving mass is on the guide side

Loads F_{y_dyn}/F_{z_dyn} and $M_{x_dyn}/M_{y_dyn}/M_{z_dyn}$

$$F_{y_dyn} = m_{b_total} \times a_y = 11.173 \text{ kg} \times 0 \text{ m/s}^2 = 0 \text{ N}$$

$$F_{z_dyn} = m_{b_total} \times (g + a_z) = 11.173 \text{ kg} \times (9.81 \text{ m/s}^2 + 0 \text{ m/s}^2) = 110 \text{ N}$$

From table → page 20

Dimension X = 56.5 mm

$$M_{y_dyn} = F_{z_dyn} \times (\text{dimension X} + \text{stroke} + L_{b_total}) = 110 \text{ N} \times (56.5 \text{ mm} + 80 \text{ mm} + 25.6 \text{ mm}) = 17.8 \text{ Nm}$$

$$M_{z_dyn} = F_{y_dyn} \times (\text{dimension X} + \text{stroke} + L_{b_total}) = 0 \text{ N} \times (56.5 \text{ mm} + 80 \text{ mm} + 25.6 \text{ mm}) = 0 \text{ Nm}$$

Functional operation with combined load

Max. values from table → page 22

$$F_{y_max} = 1130 \text{ N}$$

$$F_{z_max} = 1130 \text{ N}$$

$$M_{x_max} = 44.09 \text{ Nm}$$

$$M_{y_max} = 28.83 \text{ Nm}$$

$$M_{z_max} = 28.83 \text{ Nm}$$

$$f_v = \frac{|F_{y1}|}{F_{y2}} + \frac{|F_{z1}|}{F_{z2}} + \frac{|M_{x1}|}{M_{x2}} + \frac{|M_{y1}|}{M_{y2}} + \frac{|M_{z1}|}{M_{z2}} \leq 1$$

$$f_v = \frac{0 \text{ N}}{1130 \text{ N}} + \frac{110 \text{ N}}{1130 \text{ N}} + \frac{0 \text{ Nm}}{44.09 \text{ Nm}} + \frac{17.8 \text{ Nm}}{28.83 \text{ Nm}} + \frac{0 \text{ Nm}}{28.83 \text{ Nm}} = 0.72 \leq 1$$

Expected service life

$$L = \frac{L_1}{f_v^3} = \frac{10000 \text{ km}}{0.72^3} = 27000 \text{ km}$$

L_1 = reference service life

Peripherals overview

DFM-B-12-P

DFM-B-12-P-AJ

-  - Note

Proximity switch SM...O-8E cannot be used with the DFM-B.

Peripherals overview

Accessories		Description	→ Page/Internet
[1]	Guided drive DFM-B	Guided drive, function-optimised	42
[2]	One-way flow control valve GRLA	For regulating speed	78
[3]	Push-in fitting QS	For connecting tubing with standard O.D.	qs
[4]	Slot cover ABP-5-S	For protecting the sensor cables and the sensor slots from contamination	78
[5]	Proximity switch SME-/SMT-8/10	Can be integrated in the profile barrel	76
–	Centring sleeves ZBH	4 or 6 included in the scope of delivery	75

Variants

Datasheet

Function

- Diameter
12 ... 63 mm
- Stroke length
10 ... 400 mm

- www.festo.com

- Repair service
Piston diameter 12 ... 63 mm

$$v = \sqrt{\frac{2 \cdot E}{m_1 + m_2}}$$

$$m_2 = \frac{2 \cdot E}{v^2} - m_1$$

General technical data
