

Compact cylinders DPCA

FESTO

Key features

At a glance

- Compact design permits use in tight spaces
- Double-acting and single-acting versions
- Piston rod with external and internal thread
- With and without anti-twist protection
- With and without cushioning
- Simple assembly with suitable mounting options

System of units

[] Metric

Anti-twist protection

[Q] With anti-twist protection

- Anti-twist protection prevents the piston rod turning during movement
- Application example: position-oriented feeding

Stroke adjustment

[E] Advancing/front

- Stroke adjustment allows precision adjustment of the piston rod's advanced end position

Function

[P] Single-acting, pulling (piston rod advanced by spring force)

- The cylinder has one pneumatic connection. The piston rod is advanced in its initial position
- When the connection is pressurized with compressed air, the cylinder retracts. It is advanced by a spring

Piston rod type

[] At one end

- The piston rod can be used for connection at one end of the cylinder

System of units

[N] Inch

Running characteristics

[L4] Additional piston guide

- The piston guide serves to absorb higher transverse loads

Function

[] Double-acting

- The cylinder has two pneumatic connections which can be pressurized with compressed air one after the other
- When the rear connection is pressurized with compressed air, the cylinder advances. For retraction, the front connection is pressurized with compressed air

Function

[S] Single-acting, pushing (piston rod retracted by spring force)

- The cylinder has one pneumatic connection. The piston rod is retracted in its initial position
- When the connection is pressurized with compressed air, the cylinder advances. It is retracted by a spring

Piston rod type

[H] Through, hollow piston rod

- The piston rod can be used for connection at both ends of the cylinder
- The piston rod is hollow inside, meaning it can be used to carry vacuum or compressed air
- Identical forces in forward and return stroke

Key features

Piston rod type

[T] Through piston rod

- The piston rod can be used for connection at both ends of the cylinder
- The piston rod has an internal thread on the side of the end cap and an external thread on the other side
- Identical forces in forward and return stroke

Piston rod thread type

[F] Internal thread

**Type of mounting**

[U] With swiveling rod eye

**Type of mounting**

[U90] Swiveling rod eye, rotated 90°

**Noise reduction**

[SL]/[SL2]/[SL3] Both ends/front/rear

- Noise can be muffled with the noise reduction feature

Scraper variant

[A1] Increased chemical resistance

- FKM seals ensure a longer service life, e.g. with the use of cooling lubricants

Piston rod thread type

[] External thread

**Type of mounting**

[D] With swivel clevis

**Type of mounting**

[D90] With swivel clevis, rotated 90°

**Cushioning**

[P]/[P2]/[P3] Flexible cushioning rings/pads

- The actuator is fitted with rubber flexible end-position cushioning for absorbing higher impact energy.
- No adjustment required
- Saves time

Position sensing

[A] For proximity switch

-  - Stroke length
1/16 ... 2 inch

General technical data							
Piston diameter	1/2	3/4	1 1/8	1 5/8	2	2 1/2	3
Design	Piston						
	Piston rod						
	Cylinder barrel						
Mode of operation							
[P]	Single-acting, pulling (piston rod advanced by spring force)						
[S]	Single-acting, pushing (piston rod retracted by spring force)						
Piston rod end	External thread						
	Internal thread						
Pneumatic connection							
[]	M5		G1/8				
[N]	10-32 UNF-2B		1/8 NPT				
Piston rod thread							
[]	8-32 UNC-2A	10-32 UNF-2A	5/16-24 UNF-2A	3/8-24 UNF-2A	1/2-20 UNF-2A		
[F]	8-32 UNC-2B	10-32 UNF-2B	5/16-24 UNF-2B	3/8-24 UNF-2B	1/2-20 UNF-2B		
Stroke	[in]	1/16 ... 2			1/8 ... 1 1/2		
Cushioning							
[P2]	Flexible cushioning rings/pads at front ¹⁾						
[P3]	Flexible cushioning rings/pads at rear ²⁾						
Type of mounting							
	With through-hole						
	With accessories						
[U]	With swiveling rod eye on end cap					–	
[D]	With swivel clevis on end cap						
[U90]	With swiveling rod eye on end cap rotated 90°					–	
[D90]	With swivel clevis on end cap rotated 90°						
Mounting position	Any						

1) Not variant single-acting, pushing (piston rod retracted by spring force)

2) Not variant single-acting, pulling (piston rod advanced by spring force)

Datasheet

Operating and environmental conditions							
Piston diameter	1/2	3/4	1 1/8	1 5/8	2	2 1/2	3
Operating pressure [psi]	15 ... 150						
Operating medium	Compressed air to ISO 8573-1:2010 [7:4:4]						
Information on operating and pilot media	Operation with oil lubrication possible (required for further use)						
Ambient temperature ¹⁾ [°F]	-25 ... +250						

1) Note operating range of proximity switches

Weight [lb]							
Piston diameter	1/2	3/4	1 1/8	1 5/8	2	2 1/2	3
Product weight	0.08 ... 0.46	0.14 ... 0.81	0.28 ... 1.39	0.6 ... 3.8	0.89 ... 3.95	1.43 ... 4.73	1.89 ... 5.72

Materials	
Cover	Wrought aluminum alloy
Dynamic seals	NBR
	FPM
Piston rod	High-alloy steel
Cylinder barrel	Wrought aluminum alloy
Note on materials	Contains paint-wetting impairment substances
	RoHS-compliant
