

Round cylinders DPRA

FESTO

Key features

At a glance

- Double- and single-acting versions
- With and without protection against rotation
- With and without cushioning
- Stainless steel piston rod
- Good running performance and long service life
- The variants can be configured according to individual needs using a modular product system

System of units

[N] Imperial

Function

[] Double-acting

- The cylinder has two pneumatic connections which can be pressurised with compressed air one after the other
- When the rear connection is pressurised with compressed air, the cylinder advances. For the cylinder to retract, the front connection is pressurised with compressed air

Function

[-S] Single-acting, pushing (piston rod retracted by spring force)

- The cylinder has one pneumatic connection. The piston rod is retracted in its initial position
- When the connection is pressurised with compressed air, the cylinder advances. It is retracted by a spring

Protection against rotation

[-Q] With protection against rotation

- Protection against rotation prevents the piston rod from turning during the movement
- Application example: position-oriented feeding

Function

[-P] Single-acting, pulling (piston rod advanced by spring force)

- The cylinder has one pneumatic connection. The piston rod is advanced in its initial position
- When the connection is pressurised with compressed air, the cylinder retracts. It is advanced by a spring

Piston rod type

[] At one end

- The piston rod can be used for connection at one end of the cylinder

Key features

Piston rod type

[H] Through, hollow piston rod

- The piston rod can be used for connection at both ends of the cylinder
- The piston rod is hollow inside, so it can be used to carry vacuum or compressed air
- Identical forces in the forward and return stroke

Type of bearing cover

[] With mounting thread

- Including ring nut for combination with end cap type [NG] Without mounting thread

Type of bearing cover

[M] With trunnion flange

Type of end cap

[U] With swivelling rod eye

Type of end cap

[NG] Without mounting thread

Piston rod type

[T] Through piston rod

- The piston rod can be used for connection at both ends of the cylinder
- Identical forces in the forward and return stroke

Type of bearing cover

[B] For direct mounting

Type of end cap

[] Standard

- Including ring nut

Type of end cap

[ME] With trunnion flange

Type of end cap

[UB] With swivelling rod eye and bearing sleeve

Key features

Type of end cap

[U90] With swivelling rod eye, rotated 90°

Type of end cap

[UB90] With swivelling rod eye and bearing sleeve, rotated 90°

Compressed air supply port

[P4] Axial

- The front compressed air supply port is located on the side of the cylinder and the rear compressed air supply port is located axially on the cylinder
- Can only be selected with end cap type [NG] without mounting thread

Cushioning

[-PPV] Pneumatic cushioning, adjustable at both ends

- The cylinder is fitted with pneumatic end-position cushioning, which can be adapted by the operator for maximum performance according to the moving mass and speed
- Very powerful

Type of end cap

[ME90] Trunnion flange, rotated 90°

Compressed air supply port

[] Lateral

- The compressed air supply ports are located on the side of the cylinder

Cushioning

[-P] Flexible cushioning rings/plates at both ends

- The cylinder is fitted with flexible polymer end-position cushioning
- No adjustment required
- Saves time

Position sensing

[A] For proximity switch

By using proximity switches, any position can be detected

Key features

Corrosion protection

[-R1] Stainless steel

- For use in damp or dirty environments
- Stainless steel end cap
- Stainless steel piston rod

Temperature range

[] Standard

- The cylinder is intended for use in a temperature range of -5 ...+165 °F

Temperature range

[-T4] +32 ... +300 °F

- The cylinder is intended for use in a temperature range of +32 ...+300 °F

Extended piston rod

[...NE] 0 ... 6 inch

- The piston rod can be extended by 0 ... 6 inches

Corrosion protection

[R3] High corrosion protection

- For use in very damp or very dirty environments
- End cap made of POM
- Stainless steel piston rod
- Temperature range +32 ... +160 °F
- Operating pressure 10 ... 100 psi

Temperature range

[-T3] -40 ... +225 °F

- The cylinder is intended for use in a temperature range of -40 ...+225 °F

Wiper variant

[A4] Wiper made of NBR

- The wiper prevents dirt from getting into the cylinder

Extended piston rod thread

[...NL] 0 ... 6 inch

- The piston rod thread can be extended by 0 ... 6 inches

[1] Round cylinder DPRA	Double-acting	10
	Single-acting	30
[2] Clevis foot DAMC-C6-....-D	- For mounting the cylinder via the bearing cap/end cap - Permits a swivelling movement in one plane	51
[3] One-way flow control valve GRLA	For regulating speed	54
[4] Push-in fitting QB/QBL	For connecting tubing with standard O.D.	54
[5] Clevis foot DAMC-C6-....-B	- For mounting the cylinder via the end cap - Permits a swivelling movement in one plane	51
[6] Foot mounting DAMH-C6	For mounting the cylinder via the bearing cap/end cap	50
[7] Hex nut DAMD	- For directly mounting the cylinder - For fixing the foot mounting DAMH-C6 in place	50
[8] Sensor bracket SAMH-FB-SH	For proximity switch SDBF-FBS	52
[9] Proximity switch SDBF-FBS	Can be integrated into sensor bracket SAMH-FB-SH	53
[10] Sensor bracket SAMH-FB-4-SH	For proximity switch SDBF-FES	52
[11] Proximity switch SDBF-FES	Can be integrated into sensor bracket SAMH-FB-4-SH	53
[12] Mounting kit SMBR	For proximity switch SMT/SDBT	53
[13] Proximity switch SMT/SDBT	Can be integrated in mounting kit SMBR	53
[14] Rod clevis DARC-C6	Permits a swivelling movement in one plane	52

3) 3 - High corrosion stress

4) 4 - Particularly high corrosion stress

Datasheet

Forces [lb] at 80 psi¹⁾								
Piston Ø	9/16	3/4	7/8	1 1/16	1 1/4	1 1/2	1 3/4	2
[P] Single-acting, pulling (piston rod advanced by spring force)								
Stroke start [in]	15.7	28.4	41.2	61.8	78.6	122.3	165.7	211.8
Stroke end [in]	13.7	25.4	38.2	58.8	71.1	115.3	152.7	196.8
[S] Single-acting, pushing (piston rod retracted by spring force)								
Stroke start [in]	17.9	32.3	45.1	67.9	90.7	134.4	181.4	236.3
Stroke end [in]	17.7	31.4	44.2	64.8	86.1	129.3	176.7	226.8

1) The theoretical forces apply for full strokes only (stroke 1, 2, 3, 4, 5, and 6).

For intermediate strokes, the force at the start of the stroke is reduced due to higher spring preload. At the end of the stroke the force corresponds to that for full strokes.

Weight [lb]			
Piston Ø	9/16	3/4	7/8
Product weight	45.36 ... 385.55	99.79 ... 598.74	176.9 ... 1097.69
