

Filter silencer LFU

FESTO

Characteristics

At a glance

The filter silencer cleans the collected exhaust air from pneumatic control systems. The exhaust air escapes into the atmosphere via a fine filter insert (filter efficiency >99.99%).

At the same time, the noise from the exhaust air is greatly reduced. Any condensate is collected in the plastic bowl underneath and can be drained off via the condensate drain.

- Removes up to 99.99% of oil and other contaminants from the exhaust air
- The silencer reduces the noise from the exhaust air regardless of frequency
- Product complies with ISO 1179-1 and ISO 228-1
